**WALLHIDE®**  
**WALL PAINT**

**WALLHIDE RUBBERIZED WALL PAINT**, a latex base wall paint, provides new standards of performance for interior surfaces — new or old plaster, old paint, wallpaper, primed wood or metal, cinder or concrete block, standing cement, brick, composition board.

**NEEDS NO PRIMER . . .** WALLHIDE RUBBERIZED is its own primer due to controlled penetration. Two coats are recommended for best results, although one coat is sometimes sufficient.

**EASY TO APPLY . . .** by brush, roller or spray. It's easy for anyone to do a good job. Start or stop anytime—even touch-up missed spots. No sags or brush marks mar its velvety sheen.

**NO OBJECTIONABLE ODOR . . .** no "painty" odor either during or after application.

**FAST DRYING . . .** 20 minutes to touch. Curtains and pictures may be hung and the room put back in use in one hour. Ready for second coat in just four hours.

**CLEAN IT AGAIN AND AGAIN . . .** dirt cannot penetrate its non-porous surface. Stubborn stains, grease, crayon, mercurochrome, ink spots, lipstick or finger smears can be wiped right off without streaking or spotting.

**DURABLE . . .** the extra-tough, elastic surface will not chip, crack or rub off.

**UNUSUAL COVERAGE . . .** a spread far greater than for other types of wall paint.

**VELVET SHEEN . . .** just right for your living room, dining room and bedrooms.

Rubberized Wallhide glides on so easily with brush or roller

Rubberized Wallhide cleans again and again . . . and you clean up fast with just soap and water.

**NO DRIP — NO RUN . . .** easy to apply on ceilings and other overhead surfaces.

**FAST CLEAN-UP . . .** brushes, rollers, etc. wash out in soap and warm water. Your hands clean this easy way, too.

**AVAILABLE TOO IN HUNDREDS OF MAESTRO COLORS**

The MAESTRO COLOR System makes it possible for you to choose from literally hundreds of America's most modern decorator hues. Ask to see your Pittsburgh Dealer's MAESTRO COLOR Selector and take home any color chips you wish. This easy color planning service offers you complete color choice in RUBBERIZED WALLHIDE Wall Paint and SATINHIDE Enamel.

## SATINHIDE® ENAMEL

*For Matching Trim*

**SATINHIDE ENAMEL**, an alkyd type synthetic enamel, has a pleasing, low semi-gloss sheen backed by tough durability that is resistant to both wear and repeated washings. It outperforms other enamel products by gliding onto the surface easier, drying faster and covering more area. SATINHIDE is especially recommended for matching trim with WALLHIDE RUBBERIZED or WALLHIDE FLAT. Also for walls of kitchen, bathroom and halls or other interior walls where a lasting, low semi-gloss sheen and highly-protective finish is desirable. Recommended, too, for interior wood and metal trim and on furniture indoors and out.

**REMARKABLE SEALING PROPERTIES . . .** enable SATINHIDE to act as its own primer and undercoater on plaster or wood.

**NO OBJECTIONABLE ODOR . . .** either during or after application. Never smells "painty."

**DRIES FAST . . .** in just four hours. Becomes a permanent finish overnight.

**FAST TO APPLY . . .** SATINHIDE glides on — minimizes brush pull that often makes application of ordinary enamels so tiring.

**SCRUB IT . . .** with soap or detergents without harm to the original finish and color.

**DURABLE . . .** the perfect finish for walls and furniture in the busiest rooms. Highly resistant to marring and scuffing—will not chip, peel, crack or wrinkle.

**ONE COAT . . .** covers on most repaint work where color change is not too great, due to exceptional spread and hiding power. Use two coats for best results.
